

Viking
Side-by-Side

The power of technology

When you work hard in a tough outdoors environment you need the best tools. So we've designed the Viking to make your job a bit easier - and more enjoyable. Features like the walk-through floor and staggered 3-seat layout make access from either side quick and easy. The spacious cargo bed can be tipped to save time and effort when unloading. Smart, proven technology such as Ultramatic® transmission and switchable 2WD and 4WD helps you to get the job done. And, EPS makes driving more relaxing, while the easily accessible engine simplifies routine maintenance.

The Viking 3-seater is ready for work, but will let you enjoy the outdoors as well when you want!

Technical Features

Yamaha technology explained:

High-torque 686cc engine

The high-torque 686cc single-cylinder engine produces plenty of controllable power for effective off road transportation. For added confidence on slippery downhill slopes the Ultramatic® transmission features an engine braking function - while the 2WD, 4WD and Diff Lock modes can be quickly selected to suit different surface conditions.

3 mode On-Command® drive system

The Viking is designed to be used on a wide variety of surfaces, and the selectable, 3-mode On-Command® system offers 2WD, 4WD or 4WD with Diff Lock, options to suit different terrain and weather conditions. The simple rotary-type switch enables the driver to select their chosen drive mode in seconds.

Yamaha Electronic Fuel Injection (EFI)

The reliable 686cc 4-stroke single-cylinder engine features an advanced Electronic Fuel Injection system that ensures efficient combustion for good throttle response. Together with the forged piston and pent roof combustion chamber design, the EFI enables the Viking engine to produce gutsy torque at low rpm with strong high rpm performance.

Easy maintenance

The Viking has been designed to be robust and easy to maintain, and the location of the engine beneath the cargo bed makes it possible to gain access to the powerplant in seconds. Together with the easily accessible front-mounted components located under the hood lid, the Viking's design ensures that routine service times and costs are minimised.

3-seater / Walk-through floor

The innovative 3-seat layout features a central seat that's inclined 5 degrees further back than the left and right seats, giving each passenger more arm and shoulder room. There's also a flat walk-through floor that gives easy access and also allows the driver to step in from either side, which is particularly handy when making multiple stops.

Electronic Power Steering (EPS)

Even with 3 passengers and a full cargo load on board, the Electronic Power Steering (EPS) ensures that the steering feels light even when fully laden or when driving in heavy soils like clay. When 4WD with Diff Lock is selected the EPS switches automatically to a second programme designed to optimise the steering characteristics.

Conveniently positioned controls

For easy operation the Viking is equipped with a central instrument console, while the electric starter switch, handbrake and Gear selection lever are located to the right of the 4-spoke steering wheel. The gear shift levers allows selection of Hi or Lo gear ratios or Reverse, which means once on the move the Ultramatic® automatic transmission system ensures there is no need for any gear changing.

Front and rear double wishbone suspension

For responsive handling combined with a comfortable ride for all 3 people on board, the Viking is equipped with independent double wishbone suspension at the front and rear. This rugged system allows each wheel to follow the terrain and maintain traction on extremely rough ground, allowing you to traverse extreme landscapes.

Engine

Single cylinder, liquid-cooled, 4-stroke, SOHC, 4-valves, 686cc EFI, Electric Start

Transmission

Three-mode On-Command drive system (two-, four- and four-wheel with differential lock). Shaft final drive with dual range -Hi/Lo plus reverse automatic gearbox.

Brakes and Suspension

Dual Hydraulic disc brakes front & rear. Park brake. Independent double wishbone, 205 mm wheel travel, 5-way preload adjustment front & rear

Dimensions

Overall length	3100 mm
Overall width	1570 mm
Wheelbase	2135 mm
Min ground clearance	300 mm
Fuel capacity	36.7 litres

Loading limits

Rear load bed max capacity 272kg
Rear towing max capacity 680kg

Colour options

Three individual bucket seats

Functionality, durability and all-terrain ability.

It can be tough when you're working outdoors all year round. You need the best equipment and the hardest working partners to get the job done. So it's time to consider how the Viking can make your life a little easier! The spacious 3-seat layout and walk-through floor ensure a comfortable and safe drive every time for you and your colleagues. Its double wishbone suspension is ready to take on even the most rugged terrain while the Euro-pallet sized tipping cargo bed can carry loads up to 272kg. Equipped with our On-Command® drive system with 2WD, 4WD and 4WD with Diff Lock, and powered by a high-torque 686cc engine, the 3-seater Viking could be the best purchase you ever made!
