### **An interesting quotation**

#### **Value...**

**It's unwise to pay too much, but it's unwise to pay too little. When you pay too much you lose a little money, that is all.**

**When you pay too little, you sometimes lose everything, because the thing you bought was incapable of doing the thing you bought it to do.**

**The common law of business balance prohibits paying a little and getting a lot. It can't be done. If you deal with the lowest bidder, it's well to add something for the risk you run.**

**And if you do that, you will have enough to pay for something better.**

**John Ruskin (1819-1900)**
