Free EASI training with every new Yamaha Utility ATV*

EASI®, the European All-Terrain Vehicle Safety Institute, is a not for profit organisation which provides safety training courses for ATV riders. EASI's UK operation delivers a programme of specialist ATV training courses which are designed to improve rider skills, safety levels and awareness of the capabilities of ATVs.

Rider Training

The EASI RIDER ATV safety training course takes four and a half hours and is available for all ATV riders aged 6 and above. The EASI Rider Course is an interactive, hands-on learning experience that is both practical and enjoyable. As well as teaching safe riding techniques, the course covers safety clothing and protective equipment, pre-ride inspections, risk assessment and environmental issues.

The EASI rider course may also help businesses satisfy Health & Safety at work requirements and satisfy the PUWER regulations for operating machinery.

*TO ENQUIRE ABOUT A FREE EASI RIDER COURSE...CONTACT your local Yamaha Utility ATV dealer OR phone EASI on 01903 816 286
